

ST25K

SOLID
TRUCK
Solid Performance. Solid Truck.

Overview

Our pre-assembled axle assembly has been engineered for dependable, heavy-duty performance with reduced maintenance requirements. Each axle is built using trusted, industry-standard components and quality-controlled processes to ensure consistent reliability in demanding conditions.

Specifications

- 6" Axle Tube with Captured Beam Connection
- 25,000lbs Capacity
- Standard P-Spindle
- Standard 30/30 Brake Chamber
- Pro-Torq Locking Nut
- Axle Tube Venting
- National Seal 380065A or equivalent
- EP0 Semi-Fluid Grease Lubricated (do not cross-contaminate lubricants)

Quality

Every axle assembly is precision-set to deliver consistent performance. Wheel-end play is controlled between 0.001" and 0.005", as specified on the hub. The hub cavity is filled to 50% capacity with premium lubricant, ensuring proper distribution across the inboard and outboard bearings.

Safety

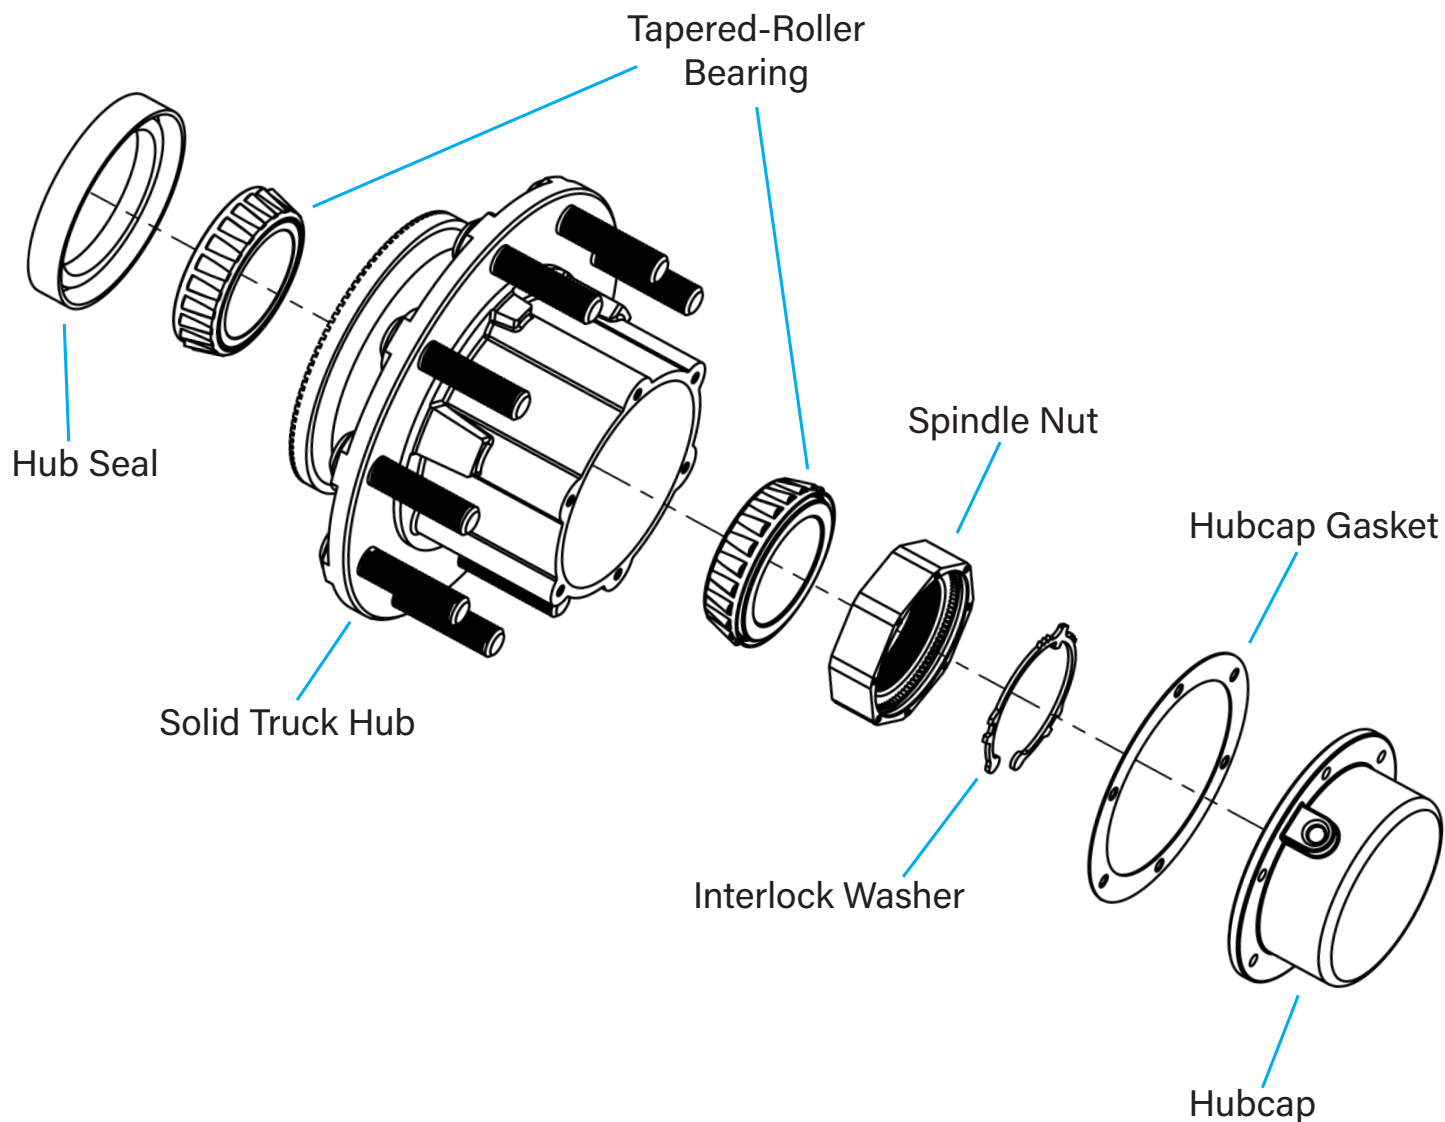

Operators must inspect the axle system regularly. Any signs of cracking, abnormal wear, or component failure must be addressed immediately to maintain safe operation and prevent damage to connected systems.

Warranty

This axle assembly is covered by a 1-year limited warranty. For full terms, conditions, and coverage details, please refer to the Warranty Policy document.
